DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipate by Makoto (JP2000025209).

With respect to claim 1, Makoto discloses an ink jet printing system in which an ink jet recording medium previously having printing control information is continuously driven with a conveying apparatus, and print data is continuously processed with an ink jet recording apparatus set in middle of a conveyance pathway, to output a printed image (Abstract, fig.4).

Allowable Subject Matter

2. Claims 2-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2-19 are allowable over prior arts of record because at least prior arts have not been found to anticipate or teach the printing control information involves the kind of an ink receiving layers.
